United Nation | July 2023 - October 2023
- Developed SME Toolkit website using HTML, CSS, JavaScript, and Drupal.
- Established site layout and user interface.
- Created web forms and optimized landing pages for cross-browser compatibility.

PROJECTS

SOFTWARE PRACTICE EMPIRICAL EVIDENCE DATABASE.
Link: https://github.com/cindychen042/Ass1B

- Led a team of 3 in developing a web app called SPEED, a searchable database of evidence about software engineering practices using the MERN technology stack.
- Spearheaded the project by defining the product scope and prioritizing features in collaboration with the product owner, with a focus on supporting evidence-based decision making for software engineering practitioner.
- Designed the SPEED app to enable users to easily search for and access empirical research on different software engineering practices, using a user-friendly interface and a standardized submission form for article suggestions.
- Successfully delivered the MVP of SPEED within the project timeline, showcasing strong leadership, communication, and problem-solving skills.

ARTICLE BASED WEBSITE
React, Django, Postgresql, AWS, Next.js
(https://www.globeofarticles.com/)
- Implemented user authentication system.
- Allowed users to create, comment, and like articles.
- Deployed using AWS tools, and with Next.js for server-side rendering.

EDUCATION

AUCKLAND UNIVERSITY OF TECHNOLOGY
March 2020 - June 2024

BACHELOR OF SOFTWARE ENGINEERING - HONORS

HIGH SCHOOL
2018

82/100 GPA.
